

Microsoft Azure Service Bus

Microsoft Azure Service Bus is a cloud-based messaging service used to connect any applications, devices, and services running in the cloud to any other applications or services.

Use metrics from Azure Service Bus to:

- Visualize your Service Bus functionality.
- Correlate your Service Bus performance with your applications.

Prerequisites

- Integration with Microsoft Azure, as detailed in [Azure Metrics](#).

Collected data

azure_service_bus_queue_size_bytes	Size of a queue in bytes
azure_service_bus_queue_max_size_bytes	Maximum size of a queue in bytes
azure_service_bus_queue_active_message_count	Count of active messages in a queue
azure_service_bus_queue_dead_letter_message_count	Count of messages that failed to transfer into another queue and have been moved into the transfer dead-letter queue
azure_service_bus_queue_scheduled_message_count	Count of messages in the scheduled state in a queue
azure_service_bus_queue_transfer_dead_letter_message_count	Count of dead-lettered messages pending

azure_service_bus_queue_size_bytes	Size of a queue in bytes
	transfer into another queue
azure_service_bus_queue_transfer_message_count	Count of messages pending transfer into another queue
azure_service_bus_topic_size_bytes	Size of a topic in bytes
azure_service_bus_topic_max_size_bytes	Maximum size of a topic in bytes
azure_service_bus_topic_active_message_count	Count of active messages in a topic
azure_service_bus_topic_dead_letter_message_count	Count of messages that failed to transfer into another topic and have been moved into the transfer dead-letter topic
azure_service_bus_topic_scheduled_message_coun	Count of messages in the scheduled state in a topic
azure_service_bus_topic_transfer_dead_letter_message_count	Count of dead-lettered messages pending transfer into another topic
azure_service_bus_topic_transfer_message_count	Count of messages pending transfer into another topic
azure_service_bus_subscription_active_message_count	Count of active messages in a subscription
azure_service_bus_subscription_dead_letter_message_count	Count of messages that

azure_service_bus_queue_size_bytes	Size of a queue in bytes
	failed to transfer into another subscription and have been moved into the transfer dead-letter subscription
azure_service_bus_subscription_scheduled_message_count	Count of messages in the scheduled state in a subscription
azure_service_bus_subscription_transfer_dead_letter_message_count	Count of dead-lettered messages pending transfer into another subscription
azure_service_bus_subscription_transfer_message_count	Count of messages pending transfer into another subscription
