

Zoom

Send your Zoom Sign-In/Sign-Out Activity Logs and Operation Logs to Coralogix for centralized monitoring and analysis. With our automated **Zoom** integration package, you gain real-time visibility into account access and administrative actions, allowing you to quickly identify security risks and operational issues.

Use it to:

- Strengthen your Zoom environment's security, ensure compliance, and enhance your ability to respond to incidents effectively
- Cross-reference Zoom events with data from other services in your environment
- Build [custom dashboards](#) and [alerts](#) with your Zoom event data

Prerequisites

This integration requires the following [OAuth Scopes](#):

- `report:read:user_activities:admin`
- `report:read:operation_logs:admin`

Permissions

To set up this integration in Coralogix, your account must have the following permissions:

Resource	Action	Description	Details
<code>integrations</code>	<code>ReadConfig</code>	View Deployed Integrations	Access information about deployed integrations.
<code>integrations</code>	<code>Manage</code>	Manage Integrations	Add, remove, or update integration packages.

Learn more about Coralogix roles and permissions [here](#).

Setup

STEP 1: Navigate to the Zoom integration

From the Coralogix toolbar, go to **Data Flow > Integrations** and select **Zoom**.

STEP 2: Add a new integration

Click **Add New** and provide the following information:

- **Integration Name**
- **Application and Subsystem:** These define metadata for the logs sent to Coralogix. Learn more [here](#).

Click **Create**.

STEP 3: Authorize Coralogix with Zoom

Click **Authorize** to install the Coralogix app. You will be redirected to Zoom's authorization page. Follow the prompts and click **Allow** to grant permissions.

Managing your integrations

Once set up, your integration will appear on the Zoom management screen. Use the right-hand icons to:

- Edit existing integrations.
- Delete integrations no longer in use.

NOTE

Integrations for which the authorization failed or has not been executed will appear as pending.

Monitoring your logs

Monitor your Zoom user sign-in and operation logs in [Explore](#) or [Custom Dashboards](#).

Support

Need assistance? Our support team is available 24/7 to help you set up and troubleshoot any issues.

Reach out to us **via in-app chat** or email us at support@coralogix.com.
