

Observability Without the Hassle

Tired of the hidden costs, complexity and security risks of building and managing your own ELK stack?

Coralogix provides a fully-managed analytics and observability platform that scales effortlessly so you can stop stressing about maintaining your ELK stack, and get back to the innovative projects that will drive your organization forward.

Out-of-the-Box Capabilities

No complex setup. Fast, powerful search. No vendor lock-in.

→ Auto-Parsing & Data Enrichment

Connect any data, in any format, and enjoy automatic parsing and real-time data enrichment.

→ Data Clustering

Automatically cluster millions of logs at ingestion for faster investigations, higher level analytics and more accurate anomalies. Convert data to trackable metrics before indexing to extract previously unattainable system and business insights.

→ ML-Powered Anomalies & Alerts

Detect abnormal activity without needing fixed thresholds, and get alerted to potential issues with dynamic alerting.

→ Version Benchmarking

Integrate Coralogix with your CI/CD pipeline and get automatic impact analysis reports on every change you make.

→ Live Tail

Get real-time, pre-index live tail to view logs from all servers in one place and with zero latency.

→ Direct Archive Query

Directly query data in the archive even if it was never indexed.

Familiar Syntax and Seamless Visualization

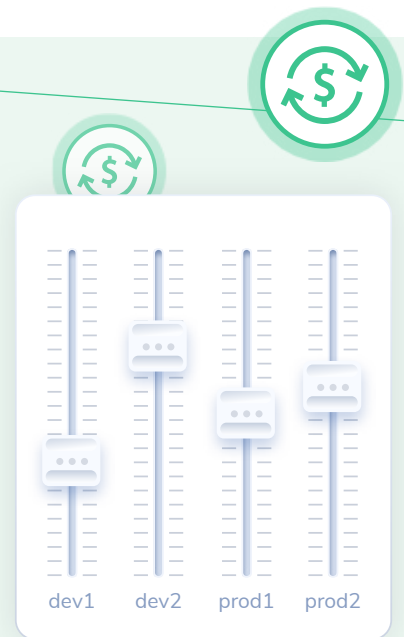

Use any syntax, including the familiar ELK syntax, for quick and easy on-boarding and no vendor lock-in.

Visualize your data anywhere including in our purpose-built UI, Kibana, Grafana, SQL clients, Tableau, or using our CLI and full API support. Our support team will be available to help you migrate your existing Kibana visualizations and alerts or to set up new ones.

Scale Effortlessly and Optimize Costs

Focus on creating value for your customers instead of managing and scaling your own ELK stack. Coralogix scales effortlessly alongside your system growth and can easily ingest data from new sources.

Using breakthrough data prioritization, Coralogix is able to reduce your total cost of ownership and ensure that data costs don't increase exponentially as your systems grow.

Enterprise-Grade Security

Coralogix is fully compliant with the highest standards of privacy and security and provides multiple geographic data centers for compatibility with various local privacy laws. Secure and audited user access, SSO, RBAC, Teams, Application/Subsystem segregation.

24/7 White-Glove Support

Offload the support of your observability stack to our dedicated support staff. Our customer support team is available 24/7 to help you with your data processing, visualization, querying, alerting needs & more.
